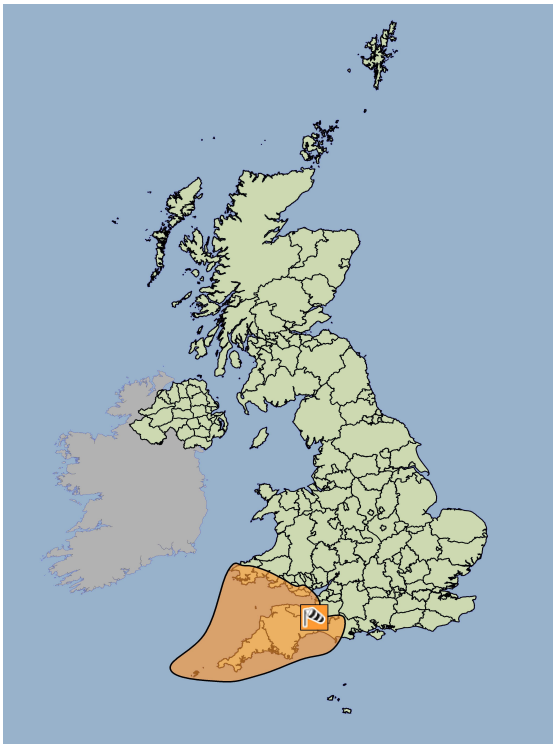
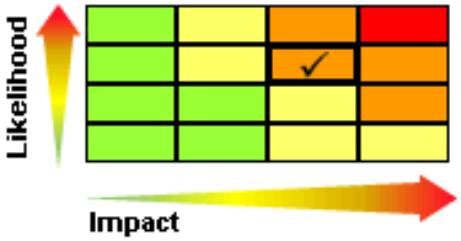
National Severe Weather Warning Service





Chief Forecasters Assessment
A deep depression will migrate slowly northeastwards across Ireland and into Scotland today, bringing rain and very strong winds across the area. A swathe of strong southwesterly winds will run east along southern counties of England this morning, with a separate area of strong winds affecting mainly northern parts of Devon and Cornwall along with South Wales this afternoon.

The Met Office have issued an **Amber Warning** of **Wind**

Valid from **07:00 on Wed, 05th Feb 2014** until **19:00 on Wed, 05th Feb 2014**

Winds are expected to gust to 60-70 mph over coasts and hills, and locally more across headlands, with 50-60 mph more generally inland. The public should be prepared for the risk of further disruption to transport and power due to fallen trees. Additionally, dangerously large waves will over top coastlines and bring the risk of further erosion and damage.
